

IMC Discussion and Preventative Maintenance

In addition to our scenario-based risk management session, we will discuss aircraft preventative maintenance at this exclusive event. With the rapidly increasing cost of flying, what can you as a pilot do to reduce maintenance costs? The FAA defines preventive maintenance as "...simple or minor preservation operations and the replacement of small standard parts not involving complex assembly operations." According to the regulations, non-A&P pilots can accomplish a surprising number of maintenance tasks. Attend this informative briefing and learn what you can do to reduce the cost of flying. Fly more with the money you save on maintenance! Click on the link below and register TODAY.

Directions: The meeting will be held in the airport office building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
