

## FAASafetyTeam Seminar - Loss of Control

Loss of Control is the leading causal factor in general aviation accidents in Central Pennsylvania—and nationwide. When we talk about loss of control we often think of the stall/spin, but there are several ways in which pilots lose control of their aircraft. In this seminar we will discuss various loss of control scenarios and how we can avoid them. We will also address how to regain control if we should find ourselves in one of these situations. Don't miss this exclusive event. Click on the link below and register TODAY.

**Directions:** The meeting will be held in the Lancaster Airport Terminal Lobby. Free Parking On-Site.

### A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafetyTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
