

York Aviation Days Open House

The use of tablet computers and smart phones has brought into the general aviation cockpit information that we could not have imagined just a few years ago! And it has done so at a relatively low cost. At this seminar, a professional pilot with much experience in the use of iPads in the cockpit will lead a discussion on utilizing the safety benefits made available by this technology. If you use an iPad in the cockpit, bring it to the seminar!

To register, click on the link below TODAY!

Directions: Automobile and aircraft parking will be available at the north end of the airfield. Directions will be provided to the hangar in which the FAASTeam seminar will be held.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
