

ASCEND 2026 - Using Pilot Stories for Training and Safety

This informal roundtable will explore how ASAP reports, NASA Aviation Safety Reporting System narratives, and other publicly available safety information can bring real-world context into flight training. Participants will discuss ways to turn actual events into meaningful scenarios, case studies, and risk-management conversations without relying on hindsight or assigning blame. Attendees are encouraged to share useful resources and techniques for helping learners connect training concepts to the decisions and challenges pilots encounter in practice.
