

ASCEND 2026 - Learn and Teach Angle of Attack Awareness

The FAA has recommended that all GA aircraft have angle of attack (AOA) indicators installed, calibrated, and pilots be trained to use the device. Few of us were taught to fly or teach lift awareness with AOA indicators, so why use them and why now? AOA indicators are a priority in reducing loss-of-control fatalities. Builders and manufacturers are installing this technology in most new aircraft, and all new trainers built under MOSAIC will have AOA indicators. Pilots have discovered that AOA indicators improve landings, and flight schools are adding the equipment to their fleets. Learn about this lifesaving technology and AOA indicator exercises you can use for training.

Follow the signs to the ASCEND Flight Training Summit meeting rooms
