

ASCEND 2026 - Using AI in Your Flight Training

This informal roundtable will explore practical and responsible ways to use artificial intelligence in flight training. Participants will discuss how AI can support lesson planning, scenario development, personalized learning, student feedback, and administrative tasks while maintaining instructor oversight and sound aviation judgment. The conversation will also address accuracy, privacy, academic integrity, overreliance, and other potential risks. Attendees are encouraged to share useful tools, successful practices, concerns, and lessons learned.
