Are you using the FAA's best practices for airport surface navigation? Remember: over 80% of pilot- caused runway incursions occur during taxi to the departure runway. Best practices for runway safety were developed by FAA staff to help pilots improve safety while operating on the surface of the airport. The mission of the FAA Office of Runway Safety is "to improve runway safety in the US by decreasing the number and severity of surface incidents and runway incursions". This seminar will offer these best practices and provide a comprehensive review of Airport Signs and Markings.

Directions: Please see map link for directions.

A message from the National FAASafety Team Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
