

Pilot Awareness and Local Airspace Navigation

This presentation will review the fundamental procedures to help reduce midair collision hazards when operating in local airspace. Pilot Awareness can mitigate those risks inherent in conducting flight operations in a specific environment. In addition, McGuire Air Force Base military safety personnel will provide important information concerning local airspace composition and procedures to comply with during military intercept of an aircraft.

Directions: See Map Link.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
