

The FAA Safety Team presents:

The Perfect Challenge!

At this exclusive briefing we will discuss the challenges of approach and landing. More accidents occur in the landing phase of flight than any other. It is the close proximity to the ground that leaves less margin for error. Some pilots never really master the basics, then it's only a matter of time before they have a problem. Is the runway long enough? Are there obstructions? What is the density altitude? Is there a cross-wind? How good is your airspeed control? Do you know how to successfully recover from a bounced landing or when to go around? Don't miss this opportunity to refresh your skills on the best practices for making safe, smooth and perfect landings! This briefing will also focus on the accident history for takeoffs and landings.

Directions: Please pre-register, and IF WEATHER IS INCLEMENT, CALL 610 595-1500 extension 240 for a possible seminar cancellation.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area
Sign up for the FAA's safety services at www.FAASafety.gov!
