

The Perfect Challenge!

More accidents occur in the landing phase of flight than any other. It is the close proximity to the ground that leaves less margin for error. Some pilots never really master the basics, and it's only a matter of time before they have a problem. Is the runway long enough? Are there obstructions? What is the density altitude? Is there a cross-wind? How good is your airspeed control? Do you know how to successfully recover from a bounced landing or when to initiate a go around? Don't miss this opportunity to refresh your skills on the best practices for making safe, smooth and perfect landings! Please register on-line for this exciting event!

Directions: Please see map link for directions, Mancini Hall is on the first floor.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area
Sign up for the FAA's safety services at www.FAASafety.gov!
