

VFR / IFR Flight Planning and Preflight Preparation

VFR / IFR flight planning covers a lot of different areas all of which are important for a successful and safe outcome to the planned flight. Deciding the route, getting an effective weather briefing, reviewing VFR & IFR departure and approach procedures, obstacle avoidance and aircraft preflight are some of the areas that will be discussed. Remember that as Pilot In Command (PIC) you are directly responsible for, and are the final authority as to the operation of the aircraft. Our guest speaker Art Telefian will provide an interesting and informative presentation helping to make you a safer pilot. Please click on the link below to register for this event on-line!

Directions: Please see map link for directions, this presentation will be held on the first floor at the Fixed Base Operator's (FBO) facility.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
