

The FAA Safety Team presents:

Flight In the Danger Zone

The majority of aviation accidents occur during the takeoff and landing phases of flight. At this presentation our guest speaker will offer a practical approach to understand procedures to safely perform takeoffs and landings in single, complex and multi-engine aircraft. This seminar will be both a presentation and an interactive discussion, so please come and add your input to our discussions to help make us all safer pilots. Please click on the link below to see more details and to register for this event on-line as seating is limited!

Directions: Please see map link for directions, go to Ronson Aviation's East Hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
