

Don't Be Dense!

What would you do if you encountered poor aircraft performance on Takeoff? Do you continue? Do you abort? This very important program will provide information on how to make the safe decisions using “what...if?” scenarios. It addresses atmospheric factors such as temperature, humidity, and density altitude. It also gives an overview of some tools available. NTSB statistics show the accident trends for airplane performance accidents on takeoff. Don't miss this exclusive event. Click on the link below and register TODAY.

Directions: The seminar will be held in Mancini Hall on the First floor.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
