

Safety Culture in General Aviation

The importance of safety culture in general aviation cannot be over-emphasized. In order to promote safety, it is necessary to build a climate and culture that encourages open communication and learning. The requirement for Safety culture training is incorporated into the FAA Safety Management Systems policy. Using a model known as the Safety Culture Pyramid, this presentation will teach general aviation operators how to improve and promote the culture within their organizations. Don't miss it. Click on the link below and register TODAY.

Directions: The seminar will be held in Mancini Hall on the first floor.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
