

Breaking the ICE!

Aircraft Icing during flight can be catastrophic! It disrupts the flow of air over the aircraft diminishing the wing's maximum lift and the propeller's thrust. This reduces the angle of attack for maximum lift, which in turn, adversely affects an aircraft's handling characteristics while significantly increasing drag. Don't get caught in this nightmare! By attending this important briefing you will learn the latest strategies for avoiding icing conditions and learn exactly what to do if you experience an inadvertent icing encounter. Click on the link below and register TODAY.

Directions: Please refer to map link for directions. Please preregister, seating is limited. If inclement weather is forecast, please call (610) 595-1500 extension 240 for possible seminar cancellation message.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

Event Details

Tue, Oct 20, 2015 - 19:00 EST
Landmark Aviation East Hanger
(formerly Ronson Aviation)
4 Pitcairn Ave.
at Trenton Mercer County Airport
Trenton, NJ 08628
