

## Toms River Aviation Safety Meeting

At this exclusive meeting we will discuss the aerodynamic limits of the aircraft and those of the pilot. This program is designed to be interactive with the pilots. Discussions will include the V-G Diagram and its implications, Angle of Attack, Decision Making Issues, DECIDE model, and I'M SAFE. Over 40% of our General Aviation accidents are happening in the traffic pattern. Have we forgotten the mastery of flight concept that our flight instructors tried to teach us when we first started flying? Parvez Dara will give you some hints, discuss the accident trends and provide some tools to help you "Know Your Limits".

Click the link below and register TODAY.

**Directions:** The meeting will be held at the Toms River Branch, Ocean County Library at the Mancini Hall.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
