

FAASTeam and PHL FSDO 17 presents:

Icing Is a Killer - Do Not Let Winter Bring You down

At this event you will learn about aircraft icing, why it forms on the aircraft, and what to do about it. Get ready for winter aircraft icing during flight, it can be catastrophic. It disrupts the flow of air over the aircraft diminishing the wings maximum lift and propeller's thrust, thus reducing the angle of attack for maximum lift; which in turn adversely effects an aircraft's handling characteristics while significantly increasing drag. Don't miss this informative briefing. Click the link below and register TODAY!

Directions: This presentation will be held on the 2nd floor of The Jet Center at the Northeast Philadelphia Airport. If there is inclement weather in the area please call 610-595-1500 ext 240 and listen to the message. The recording will be updated if the seminar is canceled due to weather. ***Inclement Weather**** If there is a chance of snow/ice or other inclement or dangerous weather conditions the seminar may be rescheduled. A decision will be made by 1500 the day of the seminar. Please call 610-595-1500 ext 240 and listen to the voice message. It will be updated if there is a cancelation.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
