

FAA Safety Team and the Philadelphia FSDO presents:

Joint Base McGuire Dix Lakehurst Drive In Airspace Safety Tour

This a unique opportunity for airman. In order to promote safe flying in the McGuire Alert Area (A-220), the 514th Air Mobility Wing Safety Team is sponsoring this program which is designed: 1) to inform general aviation pilots about the hazards of flying in busy military airspace; and 2) to provide strategies for flying safely in the McGuire airspace. The programs include presentations on the types of aircraft a GA pilot might encounter in the Alert Area, information on flight physiology, a tour of the McGuire Radar Approach Control (RAPCON) facility, and a tour of the McGuire control tower. As an added benefit, the event provides participating pilots a static tour of aircraft on the flight line, including a C-17 Globemaster III and a KC-10A Extender.

Directions: Due to Safety Concerns, this information will be provided to airman that register online and contact the tour coordinator.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
