

Safety Culture in General Aviation

The importance of safety culture in general aviation cannot be over-emphasized. In order to promote safety in our communities, it is necessary to build a climate and culture that encourages open communication and learning. The requirement for Safety culture training is incorporated into the FAA Safety Management Systems policy. Using a model known as the Safety Culture Pyramid, this presentation will teach general aviation operators how to improve and promote the culture within their organizations and the FBO's.

Directions: This presentation will be held on the first floor at the Fixed Base Operator (FBO) facility. See Map Link

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
