

We Lost Engine Power

During this 2-hour seminar with a question and answer session, we will discuss; how the reciprocating engine works and the three requirements for proper operation. Flame-Out/Loss of Power can occur on take-off, climb out or cruise. What to practice to keep you sharp. Discussion of glide speed, distance to glide, descent rate and drag will be enlightening. Additional information will be provided on engine care, fuel starvation, engine fire decision tree and angle of attack. Do not miss a minute of this seminar. Come early and please register on FAASAFETY.gov.

Directions: Mancini Hall at Ocean County Library at Toms River

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
