

FAASTeam and PHL FSDO 17 presents:

## Whats In The Plan

What will you learn in 2 hours? Suppose you decide to take a trip well beyond the cross country rule of greater than fifty nautical miles. This seminar will open your eyes as to things you will need to consider in order to complete the planned cross country flight successfully. Some of the areas to be considered are as follows: aircraft and equipment; fuel and fuel stops; weather enroute and at destination; winds at cruise altitude; terrain en route along with a safe cruising altitude. In addition to the above the speaker will be delving into pilot requirements and qualifications for the flight. When attending bring your questions and concerns for an open discussion.

**Directions:** This presentation will be held on the first floor at the Fixed Base Operator (FBO) facility. See Map Link

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Join us on Facebook: <https://www.facebook.com/groups/GASafety/>

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants.
