

FAASTeam presents:

**-LOCATION CHANGED- From Inconvenient to Irreversible -  
Avoiding Loss of Control During Emergencies**

Although most emergencies are preventable, sometimes we must rise to the occasion to meet the needs of an in-flight emergency. This presentation looks at the best tools and techniques for handling emergencies as well as avoiding loss of control during an emergency. We also look at the best ways to prevent weather related in-flight emergencies including carb icing and ice accumulation through operation, pre-flight planning, and prevention.

Pizza will be served around 6:30 pm for attendees!

**Directions:** Seminar will now be held on the second floor of the Jet Center.

Seminar Location changed from Legacy Aviation to the Jet Center.

#### **A message from the National FAASTeam Manager**
