

FAA Safety Team presents:

Preventing and Identifying Illegal Air Charters

This presentation is for all General Aviation pilots, mechanics and passengers who have questions about crossing the line into an illegal air charter situation. We will talk about -

- Part 135 Requirements
 - Pilot Qualifications and Training
 - Aircraft Certification, Maintenance and Leases
- Illegal air charter operations pose a serious safety hazard to the traveling public. The FAA works aggressively to identify and stop illegal operations and to help passengers ensure the company they hire is operating to the regulatory standard.

Air charter operations — also known as commuter and on demand operations — require a higher level of FAA pilot training and certification, aircraft maintenance procedures, and operational safety rules. This is far beyond pilots who may take family or friends for an airplane ride. FAA inspectors perform more frequent periodic checks on air charter companies' pilots, crew members and aircraft than they do on private pilot operations. Air charter crew members must undergo regular proficiency checks to maintain their FAA certifications.
