

## Where Can I Fly My Drone?

Drones have transformed industries and have made it on the wishlists of millions. By now, everyone has heard of drones or UAS or UAV.....but not everyone is aware of the requirements surrounding their use. This activity is for those familiar with drones but need more information on airspace requirements. We will dive into the areas that are safe for recreational use and commercial use. We will discuss filing a flight plan for commercial use and some common practices.

**Directions:** This presentation will be held on the first floor at the Fixed Base Operator (FBO) facility.
