

FAASTeam presents:

The Danger Zone VFR into IMC

During this 2 hour presentation Bob McCabe will cover how VFR flights which inadvertently encounter IMC continue to plague GA, with sombering results. This presentation will examine the age-old problem - ascertain why it happens (both weather and human factors), and provide guidance on what to do when it happens. We'll also look at the tools available to today's pilots, with the goal of achieving better weather analysis, and Aeronautical Decision Making (ADM). Training and proficiency strategies will also be examined

Please join us for this interesting discussion in an effort to reduce VFR - into - IMC accidents, please register below for this event today!
