

Landing an Airplane On Its Wheels

In this seminar we will look at the ins and outs of Landing Gear Systems. Going from fixed to retractable landing gear, while covering pre-flight, operations, safety issues, and maintenance.

1. Fixed Landing Gear is always ready but there are lots of things that could cause a problem during landing.
2. Retractable Landing Gear presents a whole set of different issues and problems. This is where tonight's seminar will spend most of its efforts, while giving everyone that flies a retractable gear airplane a better understanding of their system.

This presentation will be held on the first floor at the Fixed Base Operator (FBO) facility.
