

Pilot Awareness and Local Airspace Navigation

This presentation will review the fundamental procedures to help reduce midair collision hazards when operating in local airspace. Pilot awareness can mitigate those risks inherent in conducting flight operations in a specific environment.

McGuire Air Force Base Military Safety Personnel will provide important information concerning local airspace composition and procedures to comply with during military intercept of an aircraft. Intercept procedures will be covered as they relate to the airspace in the northeast corridor. Every pilot should know these procedures.

Event Details

Thu, Nov 13, 2025 at 19:00 EST

Flying W Airport

60 Fostertown Road ,Medford,NJ

Medford, NJ

Contact: Louis E Monoyios

Select #: EA17139833

Lead Representative Louis E

Collision Avoidance is a critical responsibility for all pilots. During primary training, pilots are well informed to employ collision avoidance scanning techniques outside the cockpit. However, little formal instructions is given on the proper procedures to visually identify a potential collision threat. This seminar is intended for pilots conducting flight operations in local congested airspace.

This presentation will be held on the first floor at the Fixed Base Operator (FBO) facility.
