

Mental Health in Aviation

Dr. Mapou's talk will describe mental health disorders that can affect aeronautical decision-making and lead to pilot error. These include attention-deficit/hyperactivity disorder, adjustment disorders, mood disorders, and anxiety disorders that are increasingly common in teenagers and college students. Dr. Mapou will also discuss FAA programs that are designed to get applicants into the cockpit and pilots back into the cockpit. His talk will include some examples from his practice.

Sussex County Emergency Center, signs or Civil Air Patrol Cadets will provide directions.
