

Navigating a Real In-Flight Emergency!

In this session, we will explore a series of real-world aviation incidents that required immediate action and decision-making to ensure safety. We will dissect how these situations were resolved in real-time, focusing on emergency procedures, aeronautical decision making, and proper radio technique. Through open discussion, we will evaluate the effectiveness of the actions taken and brainstorm potential improvements that could enhance future responses.

Enter through the side street access and a parking lot
