

The FAA Safety Team presents:

## Defensive Airport Navigation!

Once it happens... you can never take it back! A runway incursion is an event that no pilot would ever wish to be involved in. But, are you using the most recent procedures and best practices for operating on the surface of the airport? Do you know what they are? Attend this informative safety briefing and maximize your safety potential! All pilots and flight instructors are encouraged to attend this critical briefing titled "Defensive Airport Navigation"! Learn the strategies that airline pilots use to ensure they avoid runway incursions and surface incidents... learn from the PRO's!

**Directions:** Please see map link for driving directions.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
