

Winter Flying

All too soon, cold temperatures, icy runways and poor weather present pilots with challenges to their risk management and basic flying skills. This presentation will describe various issues of winter operations and illustrate "best practices" for dealing with them. The presenter, Tim McSwain, is a veteran CFI-I, ATP, with SELS-MEL ratings, who spent 46 years flying and instructing in a wide variety of airplanes in the Northern USA. Time will be allocated for Q&A. At the conclusion of the seminar, all attendees are invited to a cookout/buffet at the adjacent large hangar. To attend this event, click the link below and register TODAY.

Directions: Please park in front of the terminal and come to the 2nd floor of the building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
