

Pilot Decision Making:

Many skilled pilots have accidents because they made a bad decision or made no decision at all. Good pilot decision making is a mental process used by pilots to consistently determine the best course of action in response to a given set of circumstances. At this exclusive event you will learn techniques for making the right decision at the right time. We will discuss a systematic approach to identify and mitigate risk. To attend, click on the link below and register TODAY.

Directions: Seminar located inside museum.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
