

FAASTeam presents:

Autorotate and Live! Helicopter Webinar

For helicopter pilots, autorotation is our one basic emergency procedure. It's the quickest, safest way to the ground and much of emergency training is perfecting a safe reflex autorotation entry. Bob Possumato will include basic aerodynamics of an autorotation, and how to utilize energy management to increase safety and awareness of the aircraft's position in and movement through space. With thousands of hours in helicopter operations in the military and civilian world, Bob have a lot of wisdom to share with the rotorcraft community. Bob will discuss helicopter accident analysis and how to safely accomplish autorotation in training, in real world operations while managing the risk factors. Click the link below and register with FAASafety.gov and Citrix TODAY.

Directions: After you register at FAASafety.gov, I need you to also register with Citrix. They will send you a notice to "check in" and they will give you a hyperlink to connect to the webinar. The FAA uses the Citrix vendor to as a medium to connect attendees with the webinar program. Please use the hyperlink below to register with Citrix. Thanks! Maurice. Please register for "Autorotate and Live" a Helicopter Pilot Webinar at: Registration URL:
