

FAA Safety Team and the Richmond FSDO presents:

ICAO Flight Plans - A Workshop For Pilots

2017 most certainly has been the year of changes. For any pilot that files flight plans be it VFR or IFR, it is our time to invest in our knowledge of what the ICAO flight plan is, what are the differences from the previous FAA flight plans and how do we update the aircraft profile in our electronic flight planning tool bag.

For this interactive workshop, we ask that you bring your iPad, laptop, phone, tablet (your device of flying choice) along with the list of aircraft equipment you typically fly with.

Suggested reading to benefit your interactive experience can be found at the following web sites:
