

RIC FSDO presents:

Teaching Foundational Safety Elements

This forum introduces instructional best practices for teaching Human Factors & Safety Culture.

The Forum reviews Safety Risk Management, Pilot Proficiency, and Aviation Technology in the context of 3 elements that are essential to safe operations. It then introduces the topic of Human Factors and describes why they are important considerations for Flight Instructors. Examples of robust safety culture ingredients are cited and the audience is asked to compare their safety cultures to the examples.

Directions: Hanover County Municipal Airport is conveniently located twenty minutes from Short Pump, Innsbrook, and the City of Richmond with easy access to I-95 & I-295. This seminar will be held in the Heart of Virginia Flight Services Pilot Training Classroom, located to the right of the old terminal building.

"Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines."
