

RIC FAA Safety Team presents:

Surprise! Surprise!

In this presentation we'll address recommendations from the General Aviation Joint Steering Committee – a government / industry group that analyzes GA accidents and incidents. The Committee feels that improved pilot training in safety risk management, emergency procedures & maneuvers, and human factors can reduce the numbers of fatal GA Loss of Control Accidents.

During this interactive meeting we'll be watching video of some common GA activities. We'll get to know a pilot, his family, and some of his associates and we'll go along with them on a flight to a mountain airport in rural Virginia. But before that, you'll see some owner/operator maintenance activity. Don't miss this informative briefing. Click the link below and register TODAY.

Directions: This seminar will be held in conjunction with the Angel Flight Mid-Atlantic conference at the Norfolk, Virginia, Signature Flight Support - General Aviation building. Upon entering the building proceed down the hall and the seminar will be located upstairs in the conference room. "Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines."
