Select #: EA2344468

FPM Guido Hassig

iPads are rapidly dominating flight planning and flight monitoring. At this exclusive briefing, featured speakers David St. George and Pete Treichler (both FAA pilot examiners) will lead a discussion of applications, websites, and programs available to you on the iPad for flight planning and monitoring. They'll discuss what systems are available, their strengths and weaknesses, review the role of technology usage in the cockpit and share what to expect on a flight test. All the details at: <http://www.rochesterwings.com/>.

**Directions:** Take the NYS Thruway to Exit 46, proceed I-390N to Exit 17, turn right, proceed to 1295 Scottsville Road.

### **A message from the National FAASafety Team Manager**

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
