

Flying Winter Weather (Icing Avoidance)

Don't miss this exclusive briefing on Winter Operations with an emphasis on flight in icing conditions. At this seminar we will analyze a typical winter IFR flight and how to avoid the traps of "known icing" and the dangers of airframe "contamination". The featured presenter is an FAA Designated Airworthiness Representative (DAR) who specializes in icing certification. Don't miss it!

Directions: Follow State Route 13 North from the City of Ithaca under 2 overpasses to the top of the hill. The next light is Warren Road, turn left then your first right (about .5 mile) is Brown Road (airport entrance). Go straight to the red brick building with the airport beacon on the roof (this is the airport administration building).

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants.
