

The FAA Safety Team presents:

Monthly Hangar Flying Safety Meeting

Flying at night offers many advantages to pilots. These include smooth air, less traffic and beautiful views. But, these advantages come with some elevated risks. At this informative briefing we'll discuss the advantages and risks, how to manage them and most of all, how to maximize your night flying experience! We'll also review the different types of Special Use Airspace! Whether it's called restricted, prohibited, warning, alert, or military operations areas, (MOAs) it's all special-use airspace (SUA). What really lurks inside SUA, and when can you fly through it? Don't begin your next flight without refreshing your knowledge on this important subject and avoid a Pilot Deviation! Join your pilot colleagues and participate in our lively discussions! Free refreshments and snacks! Click on the link below to reserve your seat TODAY!

Directions: See map link for driving directions to the hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
