

The FAA Safety Team presents:

## CAP Landings Flight Clinic

A stabilized approach is the foundation for a good landing. In fact, a good landing is predicated on three critical components. These include: a stabilized approach; glide-distance judgment; and precision landing touchdown point. At this informative briefing we will discuss each of these components and how they can improve your landings. This briefing is open only to active Civil Air Patrol (CAP) members. For more information, please contact Rollie Zavada at (585) 248-2162.

**Directions:** NYS Thruway to Exit 44; then South 6.3 miles on NY 322 to Thomas Road; right 0.8 miles to Brickyard Road; then left 0.2 miles to Airport entrance. Meet in FBO Office - Main Hangar.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
