

The FAA Safety Team presents:

Hornell Winter Pilot Safety Seminar

Winter weather in most parts of Western NY can adversely affect flight operations. Poor weather conditions with fast moving fronts, strong and gusty winds, blowing and drifting snow, and icing conditions are just part of the conditions that require careful planning in order to minimize their effects. Each of us prepare for winter by ensuring our car has good tires, the snow blower is operational and the furnace is tuned up. But, have you taken the time to consider the effect of the winter on your flying? Attend this informative refresher on winter flying and also learn about best practices for returning to flying after a period of inactivity and a review of selected regulations. Refreshments generously provided by JetSmart Aviation Services! Click on the link below and reserve your seat today!

Directions: JetSmart Aviation Services is located in the main airport building.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
