

## Advanced Weather Resources for All Pilots

Aviation has come a long way since the Wright brothers first flew at Kitty Hawk. One thing that has unfortunately not changed as much is the role that weather plays in fatal airplane accidents. Even after a century of flight, weather is still the factor most likely to result in accidents with fatalities. Attend this informative briefing and learn about the wide range of weather forecasting resources available to pilots and how to use them to improve weather forecasting procedures for safe flight. This meeting is open only to current members of the Greyhawks Flying Club, Syracuse Flying Club and Stockbridge Flying Club. For more information, please contact Jim Ambrose at [jimambrose19@gmail.com](mailto:jimambrose19@gmail.com).

**Directions:** New York Thruway Exit 35, Carrier Circle to Route 298 West, second red light turn right on Ridings Road.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
