

## Monthly HANGAR FLYING SAFETY Meeting

Hazard identification and risk assessment are essential components of effective safety management systems. Pilots are required by regulation to acquire information relevant to proposed flights and plan for how to deal with hazards identified during the information gathering process. Flight Risk Assessment Tools (FRATs) are designed to assist with the risk assessment process. The General Aviation Joint Safety Committee recommends that pilots use FRATs to improve their risk assessment processes for every flight. Attend this informative briefing and see just how easy it can be. It may SAVE your LIFE! Free refreshments courtesy of TRUE COURSE FLIGHT SCHOOL. Click on the link below and register TODAY!

**Directions:** Meeting in TRUE COURSE FLIGHT SCHOOL hangar.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
