

## FAASTeam Flight Instructor Open Forum

At this Flight Instructor Open Forum, we will be discussing techniques and methods of teaching students transitioning from Steam Gages to Flat Panel GPS Based Avionics. Additional topic includes discussion of the use of Tablet Technologies and EFB (Electronic Flight Bag) use in the cockpit. These are becoming one of the leading causes of fatal General Aviation Aircraft Accidents. If you use a particular device - bring it! These topics will help you and help make safer pilots. Please click on the link below to register for this event today.

**Directions:** Take I-390 to Brooks Ave (Rochester Airport) Exit Westbound. Exit right to Main Terminal off ramp, and turn right into the US Airports Building parking lot. FSDO conference room is through the FAA office door.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
