

Topic of the Month

This presentation on spatial disorientation addresses recommendations from the General Aviation Joint Steering Committee – a government / industry group that analyzes GA accidents and incidents. The committee's study of accidents precipitated by loss (LoC) suggests that improved pilot knowledge of the causes and symptoms of spatial disorientation can reduce the number of fatal loss of control accidents. To attend this informative briefing, click the link below and register TODAY.

Directions: Syracuse Flight School hangar on Malden Road, south side of the airport. Park in the parking lot.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
