

## Fulton EAA Chapter Presents the Topic of the Month

Maneuvering flight is still the phase of flight where most fatal GA accidents occur – more than 25% of all fatal accidents – and half or those accidents involve a Stall/Spin scenario. We'll describe common maneuvering flight tasks, and we'll discuss common maneuvering flight accident scenarios. Finally, we'll offer some tips for successful maneuvering flight task accomplishment.

**Directions:** Oswego County Airport, County Route 176 (Whittaker Rd.) Fulton, New York. Go past the main airport entrance (heading north) to the EAA Chapter entrance. There will be a sign by the road. If flying in, you can park your aircraft on the EAA hangar ramp. [Click here to view a map.](#)

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
