

## Cortland Airfest Presents The Greatest Challenge in GA

It is hard to imagine losing control of an airplane in flight, but far too frequently that is exactly what happens and usually with serious results. Most loss-of-control accidents are fatal. These accidents happen in both VFR and IMC conditions, during the day and at night. They are not limited to inexperienced or VFR only pilots. At this informative briefing, we will discuss strategies to help you prevent losing control. We will also review some of the safety enhancements recommended by the General Aviation Joint Steering Committee (GAJSC) Loss of Control Work Group. You will be given the opportunity to discuss several pertinent case studies with the group. Click the link below and register TODAY!

**Directions:** Seminar will be held during the Cortland Airfest at Cortland County Chase Field in hangar MH-2. Look for signs. Click here for a map.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
