

FAASTeam presents:

Fulton EAA Presents the Topic of the Month Safety Meeting

Enhanced Vision Systems

The GAJSC has determined that a significant number of general aviation fatalities could be avoided if pilots were better oriented with respect to their operational environments. Weather, night, smoke and other obstructions to vision can compromise safety, especially when operating close to the ground. Enhanced and Synthetic Vision Technology – now available for installation in general aviation aircraft – could lower the number of reduced visibility accidents. We will discuss the scope and safety benefits of enhanced vision technology, Acquaint pilots with available resources, and Encourage pilots to adopt and maintain proficiency in the use of the technology.

Directions: Oswego County Airport, County Route 176 (Whittaker Rd.) Fulton, New York. Go past the main airport entrance (heading north) to the EAA Chapter entrance. There will be a sign by the road. If flying in, you can park your aircraft on the EAA hangar ramp. [Click here to view a map.](#)

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
