

Maintaining control!

According to the FAA, the number one cause of fatal general aviation accidents is loss of control inflight. This one hour, highly interactive, seminar will examine several recent inflight loss of control accidents, each representing a different scenario. Each accident will be analyzed to determine possible root causes which will reveal some effective mitigation strategies.

Directions: Located at the west end of Eisenhower Drive which runs across the north side of Brockport's Ledge Dale Airport (7G0).

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
