

FAASTeam presents:

Avoiding Holiday Travel Hazards

Late fall and early winter find us planning travel to celebrate various holidays with family and friends. These joyous occasions are sometimes marred by the tragedy of a serious accident.

This webinar will examine some of the factors that can increase the risks of holiday travel in general aviation airplanes. Strategies to help mitigate those risks will be presented. Several recent accidents will be analyzed and discussed. The webinar is sponsored by Avemco Insurance and will be presented by Gene Benson, FAASafety Team Lead Representative

Directions: This is a live webinar event which can be viewed on most desktop, laptop, and mobile devices. Participation in polls is required to earn Wings credit and some mobile devices do not support that function. For the best experience, it is recommended that the event be viewed on a desktop or laptop device.

Attendance at the entire webinar and participation in the poll questions will establish eligibility for one Basic Knowledge-3 credit in the Wings Pilot Proficiency program.

Registration on FAASafety.gov is not required.

Attendance is limited.

Click here to register for the webinar.
